

# Re-Engineer Your Presentations

*Deliver Clear, Concise, and Engaging Presentations in Half the Usual Time*

## PROGRAM BENEFITS

- Turn data into visual information
- Engage your audience immediately
- Reduce presentation development time by over 50%
- Deliver information audiences grasp
- Convince people to agree and act
- Using stories to clarify your points
- Paint verbal pictures
- Develop effective slides

## DAVE HILL

Dave was a World Championship of Public Speaking Finalist in 2004 (1 of 10 out of 20,000 contestants).

He has worked with engineers and other technical people for 30 years and understands the unique challenges they face while presenting complex data.

Re-  
THE ENGINEERED ENGINEER™

## KEYNOTE, SEMINAR AND WORKSHOP OVERVIEW

### Have you ever considered you could:

- Design content so that audiences can grasp it quickly & retain it?
- Learn what works and what fails?
- Become the sought after presenter who engages and entertains?

Engineers sometimes get a bad rap for their presentation skills. Picture an engineer, his back to the audience, reading cluttered slides word for word, somewhat oblivious to the audience's level of engagement and understanding. Or a young engineer eager to explain his ideas and gain consensus but unable to keep his audience interested. Opportunities to inform and inspire are wasted. So is a company's money.

Engineers often do not recognize the need to become exceptional speakers. They don't believe they can deliver technical material in engaging and memorable ways.

The good news is that all it takes for an engineer or anyone to become a great speaker is to learn simple strategies and tips and apply them. Dave Hill should know—as an engineer of 30 years, he has conveyed complicated information to tough audiences. The strategies, tips and advice you'll get in this program come from years of research into what does and does not work.
