Re-  
THE ENGINEERED ENGINEER™

## Keynote and Seminar Overview

- Accept challenges - embrace the opportunity for growth
- Get over set-backs – consider them even more instructive than successes
- Use humor and lightheartedness – reduce stress and anxiety
- Laugh and ponder while enjoying this hilarious interactive program.

Beyond technical skills, experience and knowledge, an organization's leadership look at your:

- Ability to deal with challenges
- Problem-solving skills and personality during a crisis
- Interactions and personnel management

Dave Hill has had 3 interesting engineering careers that brought him to over 80 countries...from areas of tribal unrest in the mountains of Papua New Guinea, to the shores of Ethiopia in Africa. He has worked as a Chief Engineer Officer on cargo ships, as an Accident Prevention Specialist, a Risk Engineer, and is now a communication skills expert, professional speakers, author, speech coach, and consultant.

He is also a storyteller and a humorist who was a finalist in the 2004 World Championship of Public Speaking.
